Newsletters, Sequences & Campaigns

Report period: {{date_range}} | Prepared by: Pedicel Marketing

Period	Emails Sent	Avg. Open Rate	Avg. CTR	Avg. Unsubscribe Rate	Total Conversions
{{date_range}}	{{emails_sent}}	{{open_rate}}%	{{ctr}}%	{{unsub_rate}}%	{{conversions}}

1. Report Overview

This report covers email marketing performance for the period specified above. Data is sourced from your email service provider (ESP) — e.g. Mailchimp, HubSpot, ActiveCampaign, Klaviyo, or Brevo. It covers all campaign types: broadcast newsletters, automated sequences, transactional emails, and cold outreach. All {{placeholder}} values are to be replaced with live platform data.

2. List Health & Subscriber Metrics

Metric	Current Period	Previous Period	Change
Total Active Subscribers	{{subs_current}}	{{subs_prev}}	{{change}}
New Subscribers Added	{{new_subs}}	{{prev_new}}	{{change}}
Unsubscribes	{{unsubs}}	{{prev_unsubs}}	{{change}}
Hard Bounces	{{hard_bounces}}	{{prev}}	{{change}}
Soft Bounces	{{soft_bounces}}	{{prev}}	{{change}}
Net List Growth	{{net_growth}}	{{prev_net}}	{{change}}
List Growth Rate	{{growth_rate}}%	{{prev_rate}}%	{{change}}
Spam Complaints	{{complaints}}	{{prev}}	{{change}}

A hard bounce rate above 2% signals a deliverability problem. Spam complaint rates above 0.1% (1 per 1,000 sends) can trigger inbox filtering penalties from Gmail and Outlook. Clean your list proactively.
